

ROLEX ZHYRONNE V. BATICAN

B.S. in Information Technology

+63 956 620 1992 rolexzhy@gmail.com Poblacion, Barili, Cebu

ABOUT ME

Recent Bachelor of Science in Information Technology (BSIT) graduate and Cum Laude awardee with a strong foundation in software development, mobile application development, and database management. Experienced in developing academic and personal projects using Java, Kotlin, Firebase, and Android Studio. A highly motivated and detail-oriented individual with strong problem-solving and analytical skills, eager to apply technical knowledge, contribute to innovative solutions, and grow professionally in the Information Technology industry.

EDUCATION

2017 - 2022	Science, Technology, Engineering, and Mathematics
Sta. Ana Academy of Barili Inc.	Completed the STEM curriculum with a focus on developing analytical thinking, problem-solving, and technical skills through advanced studies in mathematics, science, and technology-related subjects. Built a strong academic foundation that supported further studies in Information Technology.
2022 - 2026	Bachelor of Science in Information Technology
Cebu Technological University - Barili Campus	Studied core IT concepts including programming, database systems, networking, and software development. Developed practical skills through academic projects and application development using modern programming tools.

EXPERIENCE

January 2026 - May 2026	Web Developer
Joyno Media Intern	Worked as a Web Developer Intern at Joyno Media, where I developed and maintained websites using WordPress. Assisted in building responsive web pages, updating website content, and customizing themes to meet client requirements.

PROJECTS

LocalAid – Crowdsourced Assistance Application
Developed a community-based mobile application that allows users to request and offer local assistance through a crowdsourcing model. Focused on improving usability, real-time interaction, and accessibility for users within a local area.
Joyno HR System – Employee Leave Management System
Designed and developed a web-based HR system for tracking employee leave requests and approvals. Implemented features for leave submission, management, and record tracking to improve workflow efficiency for company use.
